Top Width	4"	—	4"	4"
Available Lengths	6 ft.	6 ft.	6 ft.	8 ft.
Weight	185 lbs.	209 lbs.	185 lbs.	933 lbs.

Machine-cast, steel-reinforced, produced with 5,500 psi concrete, strong, durable, can withstand repeated impact. Resistant to UV light. Won't warp or twist. Each block comes with pins to easily secure in place.

Every concrete stop block manufactured by Nitterhouse Masonry Products is produced to the highest quality standards using durable, steel-reinforced, 5,500-psi concrete—strong enough to withstand repeated impact from moving vehicles, and the harshest weather conditions year-after-year. Highly durable, concrete car stops are guaranteed to resist UV light, and will not warp or twist.

Nitterhouse's unique, Yellow Concrete Parking Blocks are bright, highly visible parking stop blocks for providing clearly visible stops for controlling traffic flow, designating parking, and as edging to define borders, sidewalks, etc. Each block is, also, integrally colored all the way through.

Concrete resists UV light—will never warp or twist!
