## COLORS AND SPECS

### PERMEABLE PAVING STONES & SLABS

The AquaPave Permeable Paving System allows rain to infiltrate a permeable concrete paving stone surface into an aggregate base before being released into storm sewers or watercourses. A key component is the use of Inbitex®, a patented geotextile fabric that removes 99.9% of oil and hydrocarbons, and up to 97% of heavy metals from storm water through microbial action. AquaPave is pedestrian and disability friendly and ADA compliant.
