

# TURFSTONE COLLECTION

## PAVERS

Turfstone is a permeable paver produced with 5,000 psi concrete in a grid like design with voids. The openings can be filled with a variety of substances. Provides a firm “breathable” foundation, requires very little maintenance, combats soil erosion, an affordable alternative to traditional paving, and allows water to penetrate into the soil.

**USES:** Driveways, Parking Areas, Walkways, Paths, & Driving Ranges

**COLOR:** Pewter
